SLEEP PREHEAT

Controller Instructions:

Connect the controller to the blanket, and then plug blanket into outlet.   A buzzer will sound, the LCD will

display light for 3 seconds, and then will backlight light 3 seconds.

Button and Display Functions：

Power Button：Push to turn on unit.

Temp Button: Use minus button to increase temperature and plus button to increase temperature.

Sleep Button：Press sleep button to set the timer. Time range is from 0.5 hours to 9 hours.

Preheat Button：The default setting on the unit is 60 minutes.   Press the preheat button to set the time

range from 30 minutes to 90 minutes.

Troubleshooting:

If a buzzer sounds during the use of this item – there are 3 possible issues.   Please check for the

following: 1) Control is not properly connected with blanket, 2) Possible short-circuit, 3) Use of wrong

voltage power receptacle.
