

---

**First Aid**

- Eye contact: Flush eyes immediately with clean running water. If symptom is serious, obtain medical treatment of ophthalmologist.
- Inhalation: Not applicable, for the product is a solid form.
- Ingestion: In case of accidental ingestion, vomit and then obtain medical care immediately.
- Skin contact: When it adheres on skin other than the treatment use, immediately wash well the adhered skin site using soap and water. Obtain medical attention if skin abnormality is felt.

---

**Fire Fighting Procedures**

Extinguishing measures:

- Wear suitable protective gears including filter respirator, etc. during fire fighting, since at fire, carbon monoxide may be produced due to imperfect combustion.
- Remove all the combustibles around the fire quickly.
- Use proper extinguishing agents.

Extinguishing agents:

Water, dry chemical powder, carbon dioxide, etc.

---

**Spill and Leak Procedures**

- Recover and put into suitable containers.

---

**Cautions for Handling and Storage**

Handling:

- No special remark. Wear a filter respirator and gloves if necessary.

Storage:

- Store in a cool area, avoiding direct sunlight.

---

**Prevention of Exposure**

Control concentration limits: Not established.

Facilities requirements:

- Not required

Protections:

- Not required. Wear a filter respirator, gloves if necessary.
-

### Physical and Chemical Properties

Appearance, etc.:	This product is a plaster in which adhesive mass is spread onto white base cloth and a face of the adhesive mass is covered with separator liner sheet. This product is packaged by polypropylene - polyacrylonitrile laminated packaging material.
Odor:	Characteristic odor.
Boiling point:	No available data.
Vapor pressure:	No available data.
Density (specific gravity):	No available data.
pH:	No available data.
Others:	None in particular.

---

### Information on Danger

Flash point:	No available data.
Auto-ignition temperature:	No available data.
Explosive limits:	No available data.
Combustibility and reactivity:	Store and handle the product, paying attention not to let it near the igniting source for it is flammable. In addition, care must be paid when it is burned, for incineration may produce carbon monoxide due to imperfect combustion.

---

### Health Hazard Information

Skin irritation:	No available data.
Eye irritation:	No available data.
Sensitization:	No available data.
Photosensitivity	No available data.
Acute toxicity:	No available data.
Subacute toxicity:	No available data.
Chronic toxicity:	No available data.
Carcinogenicity:	No available data.
Mutagenicity:	No available data.
Others:	None in particular.

---

### Environmental Effect Information

No available data.  
Take care, however, of handling since the product may affect environment.

---

## **Precautions for Disposal**

Disposal should be done by incineration.

---

## **Precautions for Transportation**

Common precautions:

- Respect the cautions for handling and storage.
  - Load neatly and take necessary measures to avoid fall, drop and damaging during transportation.
  - Observe the transportation procedures and condition required by governmental rules and regulations for land, marine or air cargo transportation, whichever subjected.
- 

## **Applicable Laws**

- No applicable laws.
- 

## **Interpretation of the Description**

For the preparation of this data sheet, not all the data and literatures have been investigated exhaustively, and, therefore, it may include any lack and/or omission of information. In addition, contents may be modified according to the publication of new findings or correction of established theory. If you make any important decision based on the descriptions herein, it is recommended to fully examine the information sources or to confirm them through your own experimentation. Numerical data of contents, physical and chemical properties, etc. are not of guaranteed values. Cautions are intended for general handlings, and it is requested to take this point into consideration for special handlings.
