

Frequently Asked Questions – BodyPartChart

1. *What Is It Made Of?*
 - a. BodyPartChart's are printed on a low-tack adhesive vinyl.
2. *How do I install the chart?*
 - a. Have 2 people hang it together
 - b. Peel the product off of the backing sheet
 - c. Apply it to the wall from top to bottom, use the yellow squeegee tool to smooth everything out.
3. *Will it damage my wall?*
 - a. No. BodyPartChart's adhesive is safe for your walls!
 - b. **WARNING:** If you have had your walls painted in the last 30 days, please wait 2 weeks before applying it to your wall.
4. *What sort of surface should I be putting it on?*
 - a. A surface that is-
 - i. CLEAN
 1. Be sure to wash down the area of the wall with a damp cloth, and make sure it is completely dry before applying the chart.
 - ii. Smooth
 1. Smooth walls work the best, slight texture is fine. Cinderblock, brick, and tile are not recommended.
5. *Can I move it?*
 - a. Of Course! Be sure to save the backing sheet, peel the border away, and place the image back on it. If you threw it away, don't worry! You can use a vinyl shower curtain as well. You can move it about 20 times before you will see a reduction in adhesion.
6. *How Can I Clean It?*
 - a. You can clean it the same way that you would normally clean the wall! The product passes all medical sterilization tests!
